|  PROPOSED RESIDENTIAL SPACE  |  NEW FENCES & GATEWAYS          |

**THE PROJECT**

Having just constructed a new Middle School building, MaCallie School needed to decide how to best use vacated space, choose a site for a new dining hall, revamp and expand its student housing, and explore improvements to its academic facilities.

**THE SOLUTION**

The Campus Plan that resulted from a very participatory process included relocating dining from its constrained location to a site on the same level of land as student housing and centered in the middle of the student housing environment. Two new housing sites were also identified, a site for a new science center, and landscape improvements along the pedestrian walkway.

A new vehicular circulation path was created along with the creation of a loop road. Playfields were relocated and expanded, and an indoor tennis pavilion was identified.

Parking improvements were also suggested. Land acquisition is an important long-range strategy.

All of the projects described above have been completed by 2016. We are now updating the Campus Master Plan 2017.

\*Project completed under previous name: Dober, Lidsky, Craig and Associates, Inc.
